

Service Plan Price List For Gerber Technology Sign and Graphics Products

Service Plan coverage is available only for equipment that is in normal working condition. Service plan coverage begins upon expiration of any existing warranty or service plan coverage. For equipment not currently under warranty or service plan, service plan coverage begins 90 days after receipt of payment and may require a qualified inspection at Gerber's current service fees.

Non-working equipment not currently under warranty or service plan will be evaluated at the factory and repaired under Gerber's published Parts and Labor Repair rates. The customer is responsible for freight charges both ways. On-site repairs, where applicable, will be quoted per incident. Please refer to the Gerber Service Price List – FastFacts Document #2009.

The **Gerber Guardian Plan** covers priority phone support, parts, labor, shipping charges, and on-site repair if necessary.

The **Gerber Service Partners Plan** covers priority phone support, and parts and factory labor when equipment is returned to the factory for repair. The customer is responsible for freight charges both ways.

The **Support First** Software Support Plan covers priority phone support via a toll-free members-only phone number, on-line software downloads and no-charge repair or replacement of Omega Security Blocks and Omega program CDs.

Please see the Plan Enrollment Forms for complete terms and conditions.
