

TITLE: Missing items in the GSPComposer |Tools |Options Menu

Category: Omega

Document Number: 3584

Supplied by: Gerber Service

Last Modified: August 2013

Summary: A solution to the empty Tools |Option menu in OMEGA 5.0

ISSUE: The TOOLS menu in OMEGA GSPComposer is empty.**CAUSE:**

1. The latest version of OMEGA updates aren't installed and/or another application on the system updated, affecting the Tools list

SOLUTION:

1. Check for OMEGA updates.
 - Close all Gerber applications including GSPTray, GSPComposer, GSPPlot, GQmgr and any other running background tasks.
 - Turn off, or postpone/delay the virus scan software (It may block some things from installing correctly)
 - Open a browser.
 - Go to START | All Programs | Omega 5.0 | Check for updates
 - Open a new Composer session. The tools should be visible now
