

Gerber PermaGrip™ Film

Feature	Benefit
Unique Adhesive System Extremely aggressive formulation	<ul style="list-style-type: none"> ◆ Aggressive adhesive system will benefit customers who are working with all types of surfaces – even low surface energy substrates, moderately rough surfaces or where exceptional “vandal resistance” characteristics are needed.
Pigmented adhesive	<ul style="list-style-type: none"> ◆ Film’s gray pigmented adhesive provides maximum opacity to enhance the finished graphic’s appearance.
EDGE READY™ Converted and processed by Gerber for use with all GerberColor™ Foils (LT Series not included) and the GERBER EDGE® and EDGE 2	<ul style="list-style-type: none"> ◆ Optimal printing performance means less wasted material and greater profit. Dependable finished product translates into repeat business.
Precision Punched	<ul style="list-style-type: none"> ◆ Precision punch pattern provides outstanding print registration with the EDGE and perfect tracking through Gerber plotters. This minimizes wasted material and increases productivity and profits.

Gerber PermaGrip has been developed for long-term applications requiring extra holding power. Uses include: Commercial, industrial and safety labels, emblems, decals, and logos.

AVAILABLE COLORS	White
PERFORMANCE LIFE (UNPRINTED)	7 years vertical, 4 years non-vertical
MINIMUM APPLICATION TEMP.	40° f (4° C)
