*Based on 3.865 inch x 5.25 inch sample size

**Cut Only materials based on square feet (cost based on 50 yd roll = 187.5 ft2)

All material calculations based on 50 yd rolls

All foil calculations based on largest length option offered (91m, 45m, or 15m)

Although foil usage will vary by color and sample design, for simple estimation purposes it is assumed 1 linear ft of foil is used for each linear ft material used to create samples.
