

Service Plan Price List For Gerber Technology Sign and Graphics Products

Service Plan coverage is available only for equipment that is in normal working condition. Service plan coverage begins upon expiration of any existing warranty or service plan coverage. For equipment not currently under warranty or service plan, service plan coverage begins 90 days after receipt of payment and may require a qualified inspection at Gerber's current service fees.

Non-working equipment not currently under warranty or service plan will be evaluated at the factory and repaired under Gerber's published Parts and Labor Repair rates. The customer is responsible for freight charges both ways. On-site repairs, where applicable, will be quoted per incident. Please refer to the Gerber Service Price List – FastFacts Document #2009.
